

Makware's Strategic Scoping and Design Approach (Ex: 500 Programs) (Maintenance, Enhancement, Migration, and Platform Conversion Examples)

Typical Project Approach

- Scope and design with least labor cost in mind
- Begin project with 100% of people on day one
- Assignment of 50 programs per Programmer, (10 Programmers Total)

Makware Approach

- Scope and design with Makware Tools in mind, (Less Time)
- Begin Project with 20% of people on day one:
 - Set organization's standards across Makware's Tools
 - Build out all automated processes where applicable
- Assignment of 100 programs per programmer, (5 Programmers)
